Finally ;when the government of Khartoum and its Janjaweed, Rapid Support Forces (RSF) and other proxy militias put all their efforts to finish their last face of genocide and ethnic cleansing in Darfur by using classes of chemical weapons and toxic gases in Jebel Marra in mid January 2016; as a result thousands of unarmed civilians were killed and maimed, more than 700,000 innocent civilians internally displaced, more than 742 villages in and around Jebel Marra totally burned to ashes, hundreds of women including minors were raped and abducted and more than 900,000 people took refuge in top hills and inside the caves of Jebel Marra lacking food, medicine and shelter. Today; as hundreds of civilians already died we have thousands survivors of chemical weapons attacks facing certain death, due to a wide variety of ailments, these include bloody miscarriages and vomiting, skin falling off from the victims, total loss of vision, bad smell of breath, changes to the color and smell of urine and stool, wounds and rashes that doesn't disappear and heal to some of the victims.

The Civil Administration of Sudan Liberation Movement in its series of fact-finding reports continued to provide firsthand information regarding the use of chemical weapons by Khartoum in Jebel Marra. Moreover; Amnesty International conducted an investigation and found overwhelming evidence that strongly suggests Sudanese government forces employed chemical weapons during their attacks in Jebel Marra. Yet; various nations including the U.S, France, Great Britain and Canada signaled their concern, but a plan mooted to have the four countries push together for an investigation evidently failed. In fact, none of these countries has taken formal steps to press for an investigation.

If chemical warfare implemented against unarmed civilians fails to provoke an investigation and accountability by the world's leading democracies, what hope is there for the people of Darfur to obtain justice, restore their rights, secure freedoms and see an end to the unfolding genocide? After all, why the chemical weapons convention exists? Inaction by the International Community not only encourages the government of

Sudan to violate the convention with impunity but also, calls into questioning the credibility of the treaty itself. Accordingly; the Civil Administration of Sudan Liberation Movement appeal the UN Security Council(UNSC), the EU, the troika countries and individual nation states including the United States, France, Great Britain, Germany, Australia and New Zealand, etc , to do as a matter of urgency the followings:-

- 1- Urge the Organization for the Prohibition of Chemical Weapons (OPCW) to investigate the use of chemical weapons in Jebel Marra.
- 2- Establish a commission to oversee dismantling of Sudan's government chemical weapons stocks
- 3- Provide healthcare for those who have been fatally affected as a result of the use of chemical weapons in Jebel Marra
- 4- Put pressure on Khartoum to lift the humanitarian blockage and embargo imposed by the regime on humanitarian supplies and unconditionally allow return of Humanitarian Aid Organizations expelled in 2009, used to provide life-saving necessitates to millions of war-affected population in Darfur, Nuba Mountain, Blue Nile state and North Sudan.
- 5- Establish a no-fly zone over Darfur
- 6- We call on the United Nation Security Council (UNSC) to implement its existing resolutions pertaining to the situation in Darfur and Sudan.

Issued on 3th of April 2017 by the Civil Administration of Sudan Liberation Movement – the liberated areas, Jebel Marra Sector.
